Fluid Phase Equilibria, 84 (1993) 371–372
Elsevier Science Publishers B.V., Amsterdam

Contents Volume 84 (1993)

Variant and invariant properties from cubic equations of state
C.F. Leibovici (Pau, France) 1–8
A simple perturbed equation of state from a pseudopotential function
S. Shen and B.C.-Y. Lu (Ottawa, Ont., Canada)..... 9–22
Calculation of critical lines in binary mixtures with the Simplified Perturbed Hard Chain Theory
A. van Pelt, C.J. Peters, and J. de Swaan Arons (Delft, The Netherlands 23–47
The fractal response of robust solution techniques to the stationary point problem
K.A. Green, S. Zhou and K.D. Luks (Tulsa, OK, USA) 49–78
Application of a generalized Bender equation of state to the description of vapour–liquid equilibria in binary systems
B. Platzer and G. Maurer (Kaiserslautern, Germany)..... 79–110
An application of the UNIFAC-RKS method to a reactive system
E. Santacesaria, M. Di Serio, R. Tesser and P. Triunfo (Naples, Italy) 111–122
Solubility of sodium chloride and sulfate in sub- and supercritical water vapor from 450–550°C and 100–250 bar
F.J. Armellini and J.W. Tester (Cambridge, MA, USA) 123–142
Saturation of high pressure gases with low volatile solvents: experiments and correlation
H. Schlichting, R. Langhorst and H. Knapp (Berlin, Germany).... 143–163
Thermodynamic properties of saturated and compressed liquid 2,2,2-trifluoroethanol
P. Sauermann, K. Holzapfel, J. Oprzynski, J. Nixdorf and F. Kohler (Bochum, Germany) 165–182
Vapor–liquid equilibrium data for ethanol–*n*-heptane–1-propanol and ethanol–*n*-heptane–2-propanol and their interpretation by a simple association model
A.G. Pradhan, V.R. Bhethanabotla and S.W. Campbell (Tampa, FL, USA)..... 183–206
Melting temperatures of several polycyclic and heteropolycyclic aromatic compounds under high pressures
C. Yokoyama, T. Ebina and S. Takahashi (Sendai, Japan)..... 207–223
Liquid–liquid–vapor phase equilibria in the system ethane + propane + eicosane: retrograde behaviour of the heavy liquid phase
J. Gregorowicz (Warsaw, Poland), Th.W. De Loos (Delft, The Netherlands) and J. de Swaan Arons (Delft, The Netherlands) 225–250
Prediction of unusual retrograde condensation in model reservoir fluids
J.M. Shaw, Th.W. de Loos and J. de Swaan Arons (Delft, The Netherlands) 251–266
A new method for predicting liquid–liquid equilibria from headspace analysis determinations over homogeneous liquid mixtures using the UNIQUAC model
Q.-Y. Hu, D.-R. Huang and S.-K. Wang (Nanjing, China) 267–280

Excess Gibbs energies and excess enthalpies of liquid binary mixtures containing nitroalkanes
B. Marongiu, R. Monaci and S. Porcedda (Cagliari, Italy)..... 281–296
Phase equilibrium study for separation of ethanol–water solution using subcritical and supercritical hydrocarbon solvent extraction
H. Horizoe, T. Tanimoto, I. Yamamoto (Hiroshima, Japan) and Y. Kano (Yokohama, Japan)..... 297–320
A method for the calculation of combined phase and chemical equibria: thermodyamics of the methathesis of 1-octene in the liquid phase
F.H.M. Dekker, R. Spronk and J.C. Mol (Amsterdam, The Netherlands)..... 321–338
Improving the treatment of heavy hydrocarbons by the SRK EOS
G. Soave (Milan, Italy)..... 339–342
Phase equilibria needs for petroleum exploration and production industry
F. Montel (Pau, France)..... 343–367

Author index..... 369

Contents of Volume 84 (1993)..... 371–372
